EDITO

Dear Colleague, Dear Friend,

It is my pleasure and honour to welcome you to Preservation Rhinoplasty 'Young Generation' 2024.
The meeting takes place from Friday 2nd to Sunday 4th February, 2024 at the Hyatt Regency Palais de la Méditerranée in Nice, France.
Today, the world of rhinoplasty is in effervescence and full of excitement.
Many significant innovations are now occurring in rhinoplasty, such as new biomechanical anatomy concepts, new instrumentation and new techniques. Preservation Rhinoplasty is a philosophy of remodeling the existing nasal anatomy, using very few tissue resections and very few grafts, thus leading to natural appearance of the nose, which most of the patients are seeking for. Dorsum preservation and tip modifying sutures minimize the need for immediate mid-vault reconstruction and allow minor revisions rather than rib-grafts, giving greater predictability with less risk.

Nowadays in primary rhinoplasty, patient selection and surgical concepts look being critical in the evaluation of the benefit/risk ratio.
The aim of this 3-day meeting is to show the most recent advances introduced by the rhinoplasty masters. We do thank the world-class experts coming to this meeting to share their experience in structure and classic rhinoplasties as well as in preservation rhinoplasty.
The Organizing committee wishes you an enjoying meeting
With my best personal regards,

Dr Yves Saban
